Description

La incercarea autentificarii pe website-ul [www.drmax.ro](http://www.drmax.ro) cu credentiale valide, campul de autentificare a sugerat revalidarea adresei de e-mail aceasta nefiind recunoscuta. S-a cerut un link de revalidare, nu s-a primit, utilizatorul a reincepat autentificare cu credentialele initiale folosite la crearea contului. Rezultat fiind acelasi, sistemul solicita revalidarea adresei de e-mail.

**Steps:**

1. S-a accesat adresa de e-mail folosita si asociata contului inregistrat " .....@yahoo.com;
2. S-a verificat folderul "Inbox" si "Spam" din posta electronica, linkul de revalidare nu a fost generat catre adresa de e-mail asociata contului.
3. S-a reincepat autentificarea in contul creat cu credentiale folosite la creare, sistemul nu recunoaste ca fiind valida adresa de e-mail, solicita prin mesajul afisat, "Nu te-ai putut loga. Your account is not verified, check your email or [click here](#) to resend verification email" , revalidarea acesteia.

**Expected result / Rezultat asteptat**

Dupa introducerea credentialelor valide primirea unui link, la adresa de e-mail declarata, pentru revalidarea contului / After entering the valid credentials you will receive a link, at the declared e-mail address, to revalidate your account.

**Actual result / Rezultat real**

Credentialele folosite la crearea contului nu sunt recunoscute, acceptate. / Credentials used to create the account are not recognized, accepted.
